

Inflatable Seatbelts

Safety Benefits

- Product is a fusion of airbag and seatbelt technology designed to provide enhanced occupant protection
- Fully inflated belt approximately 5x wider than standard seatbelt reducing injuries by distributing crash force energy across more of the occupant's body
- Unique softer rolled edge belt webbing provides for more comfort to passenger
- Enhanced safety benefits for both front and rear seat applications

Product Description

- Gas flows through patent pending buckle technology allowing for use of standard seatbelt retractors
- Inflatable seatbelt utilizing KSS high volume cold gas inflator (CGI)
- Inflated cushion is 5.0" to 5.5" diameter
- Designed to provide incremental belt pretensioning during deployments
- Available both as a rigid & flexible mounting application design
